Education

Vellore Institute of Technology, Vellore

2022 – Present

Bachelor of Technology in Computer Science and Engineering (Blockchain Technology)

CGPA: 8.72

Technical Skills

Programming Languages: Java, JavaScript, C, C++, Python

Web Development: ReactJS, Node.js, Next.js, HTML5, CSS3, Bootstrap, TailwindCSS, REST APIs

AI and Automation: Prompt Engineering, OpenAI API, Workflow Automation, Python Scripting

Databases: SQL, PostgreSQL, Firebase, Supabase, SheetsDB

Tools & Technologies: Git, GitHub, Vercel, Figma, Arduino, RFID, CI/CD

Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, SDLC, OOP

Other Skills: Generative AI, Microsoft Office Suite, Problem-solving, Debugging

Experience

Krenko Technologies Pvt. Ltd.

May 2025 – June 2025

Full Stack Developer Intern

Remote

- Built and deployed 12 responsive web layouts with ReactJS, HTML5, and CSS3, improving user engagement by 28% and reducing page load time by 1.8 seconds through code optimization.
- Translated business requirements into scalable frontend features, collaborating with designers and backend teams, and enhanced cross-device compatibility across mobile, tablet, and desktop platforms.
- Integrated Firebase authentication and REST APIs, implemented CI/CD pipelines using Git and Vercel, ensuring smooth deployments and maintaining 99.2% uptime.

JTM Textile Industries LLP

June 2024 – July 2024

Software Development Engineer Intern

Ahmedabad, Gujarat

- Built scalable inventory management system using ReactJS and Firebase, managing 850+ daily transactions and reducing stock tracking time from 45 minutes to 18 minutes.
- Architected modular React components with clean code practices, reducing development time for new features by 30% and enhancing long-term system maintainability.
- Designed responsive UI with mobile-first approach, reducing data entry errors by 32% through intuitive dashboards and contributing to acquisition of 3 new B2B clients.
- Collaborated directly with business stakeholders to digitize previously manual workflows.

Projects

VHM Tex Ind Pvt. Ltd. Website [Link](#) | HTML5, CSS3, JavaScript, Firebase, Hostinger

June 2025 – July 2025

- Designed professional business website from scratch, increasing site traffic by 140% and generating 38 qualified business inquiries within first 8 weeks of launch.
- Implemented responsive design achieving compatibility across devices and browsers, reducing bounce rate by 42% and improving Google PageSpeed score from 67 to 91.

Secure RFID Vehicle Access Control System | Arduino, Node.js, C++, RFID Module

March 2025 – April 2025

- Developed IoT-based RFID access system using Arduino Uno and RC522 module, processing 480+ successful authentications with 99.6% accuracy rate.
- Built real-time monitoring dashboard using Node.js and WebSocket protocol for remote vehicle entry/exit tracking, demonstrating hardware-software integration proficiency.

JTM Inventory Manager [Link](#) | ReactJS, HTML5, CSS3, Vercel

April 2024 – May 2024

- Built inventory management web app using ReactJS, managing 520+ SKUs across 8 quality categories and improving inventory accuracy from 76% to 93%.
- Designed dashboard with data visualization and mobile-responsive layout using React Hooks and Context API, reducing training time by 45% for factory teams.

Achievements

Winner at Hack-off V4.0 Hackathon

Won Hack-off V4.0 by IET for an innovative solution, highlighting problem-solving, teamwork, and presentation skills.

Best UI/UX Award at WomenTechies Hackathon

Won Best UI/UX at WomenTechies Hackathon (GDSC VIT) for designing an intuitive, user-friendly, and impactful interface.
